Abstract

Basic Abstract

DE4016353 A The applicator for creams, jellies etc. esp. for medicinal purposes, onto the bodies of humans or animals, incorporates a tubular container (5) at one of which is a filler-opening closed by a closure-piece (35). The other end of the container (5) has an outlet duct (11) with outlet hole (30) containing a non-return valve (32).

A brush-type applicator (2,3) is detachably held on the container (5) near the outlet-duct opening (30), the container (5) has an to-and-fro moving piston (9) for ejecting the treatment cream or jelly through the duct (11) between the bristles (3) of the brush.

USE/ADVANTAGE - The cream or jelly is applied in a sterile and metered and easy way. (Dwg.1/5)
